The event was a training program focused on the utilization of Micromedex, a comprehensive online clinical resource, widely used in the healthcare and pharmaceutical sectors. The training program aimed to equip participants with the necessary skills to effectively navigate and extract relevant information from Micromedex. The program was conducted by a renowned resource person, Amaranth.

Event Details: The training program commenced at 9:00 AM and was attended by students, faculty members, and professionals from the pharmacy and healthcare fields. The seminar hall was well-equipped to accommodate the participants and facilitate interactive learning.

The event was structured to cover various aspects of Micromedex usage, including:

Introduction to Micromedex: The session began with an overview of Micromedex, highlighting its importance as a reliable clinical resource for drug information, toxicology, patient education, and more.

Navigating the Platform: Participants were guided through the platform's user interface, emphasizing how to efficiently search for drug monographs, interactions, dosage information, and disease-related data.

Interpreting Drug Interactions: Amaranth delved into the complexities of drug interactions, demonstrating how to interpret the information provided by Micromedex to ensure safe and effective patient care.

Clinical Decision Support: The resource person elaborated on how Micromedex aids healthcare professionals in making informed clinical decisions based on evidence-based information.

Patient Education Materials: Participants were introduced to the patient education materials available on Micromedex, enabling them to effectively communicate essential information to patients regarding their medications and health conditions.

Updates and Alerts: Amaranth emphasized the importance of staying updated with the latest medical information and how Micromedex provides alerts and notifications about emerging trends and changes in drug information.

Interactive Session: The training program featured interactive sessions where participants could ask questions, seek clarification, and engage in discussions related to specific scenarios and challenges they face in their professional roles.

Resource Person - Amaranth: Amaranth, the esteemed resource person for the event, is widely recognized for expertise in pharmacology and clinical pharmacy. With extensive experience in the pharmaceutical industry and academia, Amaranth has contributed significantly to the field through research, training, and consultancy.
