No. of Students Participated : 30

No. of Students benefitted : 30

A training program on Micromedex was conducted on 07/03/2023 for fourth Year Pharm D students. A at seminar hall. Dr Suja Abraham H .O. D of Department of Pharmacy practice was introduced the resource person. The resource person was `Amaranth N , a senior consultant and trainer from Micromedex India. The program covered the key features of Micromedex, such as:

- Indian Brand Names: This feature allows users to search for drugs by their brand names in India, and get information on their generic names, indications, dosages, interactions, adverse effects, and more.
- Research Analysis: This feature provides users with evidence-based summaries of clinical studies on various topics, such as drug efficacy, safety, comparative effectiveness, and cost-effectiveness. Users can also access the full-text articles and critical appraisal tools.
- Activity Reports: This feature enables users to generate reports on their usage of Micromedex, such as the number of searches, topics, and documents accessed, and the time spent on each session. Users can also customize the reports by date range, user group, and other parameters.

The training program was interactive and engaging, with quizzes, case studies, and demonstrations. The participants gave positive feedback and expressed their interest in using Micromedex for their academic and clinical needs.
