Program highlights and description

National Pollution Control Day 2021:

December 2 is observed as National Pollution Control Day every year. The day is observed in the memory of those who have lost their lives in the Bhopal Gas tragedy on the night of December 2nd and 3rd, 1984.

Many people died due to the poisonous gas Methyl Isocyanate, also known as MIC. The Bhopal Gas Tragedy is considered one of the biggest industrial pollution disasters.

Environmental pollution, directly and indirectly, affects the quality of life more than one can imagine. All this is mainly caused by human activities which harm the environment in more than one way. Nowadays, pollution prevention is a major global concern because everyone on the earth is entitled to clean air to breathe, water to drink, and to enjoy public lands.

National Pollution Control Day 2021: Significance

According to the National Health Portal of India, every year around 7 million people globally die due to air pollution, 4 million of whom die from indoor air pollution.

The pollution level is so high that nine out of ten people globally do not have access to safe air. Notably, the pollutants present in the air are so tiny that they can pass through the mucus membrane and other protective barriers to damage the lungs, heart, and brain.

Objective

The main objective is **to make people aware, spread awareness in the industries that cause various pollution like water, air, soil, noise and affect the environment and obviously health**

Program Outcome

National Pollution Control Day 2021 is observed annually on **December 2** to remember the people who lost lives during 1984 Bhopal Gas Tragedy. It is also the day to raise awareness about the hazards of air pollution.
